the same time, the fact that the *in vitro* and *in vivo* results are in good agreement, and that the *in vivo* results are in good agreement with the results obtained in the *in vitro* studies, is a strong indication that the model is valid.

The model is a simple one, and it is not clear how it can be extended to include more complex situations. However, it is clear that the model is a good starting point for the development of more sophisticated models.

The model is a simple one, and it is not clear how it can be extended to include more complex situations. However, it is clear that the model is a good starting point for the development of more sophisticated models.
